We Oppose Socialized Medicine in America!
Vote "NO" on Government Run Health Care

We, your constituents, have signed this petition against socialized medicine and the trillions of dollars in new taxes that it would take to pay for it. Health care reform should not consist of more government intervention in the health insurance market, but less. Citizens should be free to choose the health care plan that fits their needs and their budget, and should not be forced to become part of the government health care system.

We also oppose the trillions of dollars in taxes that will result in any government health care plan, whether this is a tax on alcoholic drinks, soda or health care benefits. During an economic recession, the government should not be raising our taxes. We the undersigned oppose socialized medicine and ask you to vote against it, and the higher taxes necessary to fund it.
